Education

Rajiv Gandhi Technical University

Bachelor of Technology in Computer Science

Jul 2017 – Jun 2021

Bhopal, MP

Udacity Nanodegree

Java Web Developer

May 2020 – Aug 2020

Bhopal, MP

Experience

Infosys

Specialist Programmer

Feb 2023 – present

Pune, MH

- Enhancing my understanding of micro-services architecture and enhancing my skills in Java and Spring Boot, leading to a 25% increase in project delivery speed.
- Pioneered the integration of Apache Kafka and elastic search into the existing technology stack, resulting in reduction in data retrieval time and enabling real-time insights for decision-making processes.
- Executed Spring Integration framework for effective communication across micro-services architecture, utilizing transformers and filters. This resulted in a 25% improvement in inter-service communication efficiency and reduction in data processing time.
- Exhibiting expertise in building robust and scalable API using Spring Boot technologies, contributing to a 20% reduction in development time and improvement in API performance.

Cognizant Technology Solutions

Programmer Analyst

Aug 2021 – Jan 2023

Pune, MH

- Achieved efficient infrastructure development for a life science project by developing and customizing ServiceNow instances based on user stories, demonstrating strong problem-solving skills.
- Enhanced Java and JavaScript modules, aligning them with project requirements and maintaining high-quality standards, achieving a 20% improvement in reliability metrics.
- Collaborated with development teams to design and implement infrastructure solutions using agile methodologies.
- Ensured consistent project success through rigorous participation in code reviews, testing, and debugging processes, maintaining high-quality code standards and achieving a 15% reduction in bug density.

Projects

SuperDrive - File Management | Spring MVC, Selenium, Thymleaf

Jul 2021

- Contributed to core functionalities including CRUD operations for file and note management using Spring Boot.
- Implemented Selenium to create an instance of Chrome in order to interact with the correct elements of the web page.
- Ensured secure access to user data by integrating Spring Security for authentication and role-based authorization.
- Implemented unit and integration tests using JUnit and Mockito to ensure application reliability and maintain high-quality code standards, illustrating a commitment to quality.

Pinterest Clone App | Spring Boot, IntelliJ, Angular

Nov 2020

- Developed RESTful API endpoints for user authentication, image uploading, pin creation, and search functionalities.
- Incorporated Guava cache to optimize application performance by caching frequently accessed data, reducing response times and enhancing overall system efficiency.
- Integrated Elasticsearch to optimize search capabilities, enhancing user experience.
- Developed Angular components for user profile, pin boards, and search functionality.
- Utilized Spring Cloud Eureka server for service discovery and registration, enabling efficient communication and coordination between microservices in a distributed architecture.

Technical Skills

Languages: Java, typescript, HTML/CSS, JavaScript, SQL/NoSQL

Developer Tools: VS Code, IntelliJ, SonarQube, Google Cloud Platform, Postman, Draw.io

Technologies/Frameworks: Angular, Rest API, Elastic, Jenkins, Kafka, Spring Boot, GitHub, JUnit, Microservices

Professional Certifications

- Google Cloud Certified Cloud Digital Leader, 2024
- GitHub Foundation, 2024
- Microsoft Azure Fundamentals, 2021
- Certified Jenkins Engineer, 2020
